

LESSON
13.2 Area of Triangles

COMMON CORE 6.G.1
Find the area of right triangles, other triangles, ... by composing into rectangles ...

ESSENTIAL QUESTION
How do you find the area of a triangle?

EXPLORE ACTIVITY 1 **COMMON CORE 6.G.1**

Area of a Right Triangle

A Draw a large rectangle on grid paper.
What is the formula for the area of a rectangle? $A = bh$

B Draw one diagonal of your rectangle.
The diagonal divides the rectangle into two right triangles.
Each one represents $\frac{1}{2}$ half of the rectangle.
Use this information and the formula for area of a rectangle to write a formula for the area of a right triangle. $A = \frac{1}{2}bh$

Reflect

1. **Communicate Mathematical Ideas** In the formula for the area of a right triangle, what do b and h represent?
base and height

EXPLORE ACTIVITY 2 **COMMON CORE 6.G.1**

Area of a Triangle

A Draw a large triangle on grid paper. Do not draw a right triangle.

B Cut out your triangle. Then trace around it to make a copy of your triangle. Cut out the copy.

C Cut one of your triangles into two pieces by cutting through one angle directly across to the opposite side. Now you have three triangles — one large triangle and two smaller right triangles.

Lesson 13.2 377

EXPLORE ACTIVITY 2 (cont'd)

When added together, the areas of the two smaller triangles equal the area of the large triangle.

D Arrange the three triangles into a rectangle.
What fraction of the rectangle does the large triangle represent? $\frac{1}{2}$ half
The area of the rectangle is $A = bh$. What is the area of the large triangle? $A = \frac{1}{2}bh$
How does this formula compare to the formula for the area of a right triangle that you found in Explore Activity 1?
It's the same

Reflect

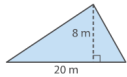

2. **Communicate Mathematical Ideas** What type of angle is formed by the base and height of a triangle?
Right angle

Finding the Area of a Triangle

Area of a Triangle
The area A of a triangle is half the product of its base b and its height h .
 $A = \frac{1}{2}bh$

EXAMPLE 1 **COMMON CORE 6.G.1**
Find the area of each triangle.

A

$b = 20$ meters $h = 8$ meters

$A = \frac{1}{2}bh$
 $= \frac{1}{2}(20 \text{ meters})(8 \text{ meters})$ *Substitute.*
 $= 80$ square meters *Multiply.*

378 Unit 6

Find the area of each triangle.

B

$b = 12$ inches $h = 5$ inches

$$A = \frac{1}{2}bh$$
$$= \frac{1}{2}(12 \text{ inches})(5 \text{ inches}) \quad \text{Substitute.}$$
$$= 30 \text{ square inches} \quad \text{Multiply.}$$

YOUR TURN

Find the area of the triangle.

3.

$A = \frac{1}{2}bh$

$$= \frac{1}{2}(8.5)(14)$$
$$= 59.5$$

$A = 59.5$

Math Talk

Mathematical Practices:

Why can you also write the formula for the area of a triangle as $A = \frac{bh}{2}$?

Problem Solving Using Area of Triangles

You can use the formula for the area of a triangle to solve real-world problems.

EXAMPLE 2

Each triangular face of the Pyramid of Peace in Kazakhstan is made up of 25 smaller equilateral triangles. These triangles have measurements as shown in the diagram. What is the area of one of the smaller equilateral triangles?

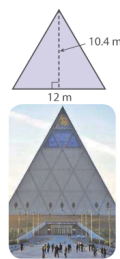

STEP 1 Identify the length of the base and the height of the triangle.

$b = 12$ m and $h = 10.4$ m

STEP 2 Use the formula to find the area of the triangle.

$$A = \frac{1}{2}bh$$
$$= \frac{1}{2}(12)(10.4) \quad \text{Substitute.}$$
$$= 62.4 \quad \text{Multiply.}$$

The area of one small equilateral triangle is 62.4 m^2 .

Lesson 13.2 379

Reflect

4. **Persevere in Problem Solving** What is the total area of one face of the pyramid? What is the total surface area of the faces of the pyramid, not counting the bottom? (Hint: the bottom of the pyramid is a square.)

YOUR TURN

5. Amy needs to order a shade for a triangular-shaped window that has a base of 6 feet and a height of 4 feet. What is the area of the shade?

$A = \frac{1}{2}bh$

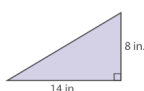

$$= \frac{1}{2}(6)(4)$$
$$= 12$$

$A = 12$

Guided Practice

Find the area of each triangle. (Explore Activities 1 and 2, Example 1)

1.

$A = \frac{1}{2}bh$

$$= \frac{1}{2}(\text{ })(\text{ })$$
$$= \text{ } \text{ in}^2$$

2. A pennant in the shape of a triangle has a base of 12 inches and a height of 30 inches. What is the area of the pennant? (Example 2)

$$A = \frac{1}{2}bh$$
$$= \frac{1}{2}(\text{ })(\text{ })$$
$$= \text{ } \text{ in}^2$$

ESSENTIAL QUESTION CHECK-IN

3. How do you find the area of a triangle?

Personal Math Trainer Online Assessment and Intervention my.hrw.com

380 Unit 6

Name _____ Class _____ Date _____

13.2 Independent Practice

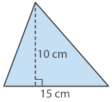

6.G.1

Personal Math Trainer

Online Assessment and Intervention

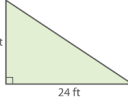

Find the area of each triangle.

4.

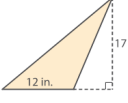

$A = \frac{1}{2}bh$
 $= \frac{1}{2} \cdot 15 \cdot 10$
 $= \frac{1}{2} \cdot 150$
 $= 75 \text{ cm}^2$

5.

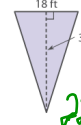

$A = \frac{1}{2}bh$
 $= \frac{1}{2} \cdot 24 \cdot 20$
 $= \frac{1}{2} \cdot 480$
 $= 240 \text{ ft}^2$

6.

$A = \frac{1}{2}bh$
 $= \frac{1}{2} \cdot 12 \cdot 17$
 $= \frac{1}{2} \cdot 204$
 $= 102 \text{ in}^2$

7.

$A = \frac{1}{2}bh$
 $= \frac{1}{2} \cdot 18 \cdot 32$
 $= \frac{1}{2} \cdot 576$
 $= 288 \text{ ft}^2$

8.

What is the area of a triangle that has a base of $15\frac{1}{4}$ in. and a height of 18 in?

$15\frac{1}{4} \cdot 18 = 274.50$
 $\frac{274.50}{2} = 137.25$

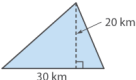

9.

A right triangle has legs that are 11 in. and 13 in. long. What is the area of the triangle?

$\frac{11 \cdot 13}{2} = 71.5$

10.

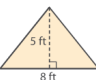

A triangular plot of land has the dimensions shown in the diagram. What is the area of the land?

$A = \frac{1}{2}bh$
 $= \frac{1}{2} \cdot 30 \cdot 20$
 $= \frac{1}{2} \cdot 600$
 $= 300 \text{ km}^2$

11.

The front part of a tent has the dimensions shown in the diagram. What is the area of this part of the tent?

$A = \frac{1}{2}bh$
 $= \frac{1}{2} \cdot 8 \cdot 5$
 $= \frac{1}{2} \cdot 40$
 $= 20 \text{ ft}^2$

12. Multistep

The sixth-grade art students are making a mosaic using tiles in the shape of right triangles. Each tile has leg measures of 3 centimeters and 5 centimeters. If there are 200 tiles in the mosaic, what is the area of the mosaic?

$A_{\text{tile}} = \frac{1}{2} \cdot 3 \cdot 5 = 7.5 \text{ cm}^2$
 $A_{\text{mosaic}} = 200 \cdot 7.5 = 1500 \text{ cm}^2$

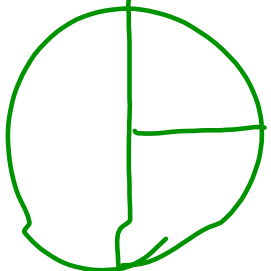

13. Critique Reasoning

Monica has a triangular piece of fabric. The height of the triangle is 15 inches and the triangle's base is 6 inches. Monica says that the area of the fabric is 90 in². What error did Monica make? Explain your answer.

$A = \frac{1}{2}bh = \frac{1}{2} \cdot 6 \cdot 15 = 45 \text{ in}^2$
Monica forgot to divide by 2.
